Experience

Senior Full Stack Engineer

01/2026 – ongoing

TechPods / BSRIA

- **Leading development of a multi-tenant SaaS platform (BG6)**, reducing feature delivery time by ~30%
- Designing scalable backend architecture using **.NET 10 (Clean Architecture)**, improving maintainability and code reuse
- Driving migration from **Blazor to Next.js (TypeScript + TailwindCSS)**, improving UI performance and dev velocity
- Building design-driven UIs aligned with **Figma** and integrating **REST APIs**, enhancing user experience and consistency
- Improving CI/CD workflows with **Azure DevOps pipelines**, reducing build and deployment time by ~40%
- Tech Stack: .NET 10 | Next.js | TypeScript | MongoDB | TailwindCSS | Azure DevOps

Full Stack Engineer

01/2025 – 01/2026

Aristocrat / Pariplay

- **Delivered enterprise-grade integrations** across distributed systems, supporting high-availability environments
- Worked with legacy systems, improving reliability and reducing production issues by
- Tech Stack: .NET Framework 4.3 (MVC) | Vanilla JavaScript | MS SQL | MongoDB | Redis

Technical Lead

02/2024 – 01/2025

Unisoft / Avexys

- **Led migration of a 21-year-old legacy system** to a modern web platform, reducing system complexity and maintenance overhead
- Designed backend services and APIs using **.NET Core and PostgreSQL**, improving performance and scalability
- Tech Stack: .NET Core 8/6 (ASP Web Api) | Postgres | Docker | Python | .NET Framework 4.6 (MVC)

Full Stack Engineer

10/2023 – 02/2024

WeLoveDigi

- Built scalable web applications and improved delivery workflows
- **Introduced CI/CD pipelines and architectural improvements**, reducing deployment time and manual errors
- Tech Stack: ASP.NET Core | Angular | Angular Material | Azure | GitHub Pipelines

Full Stack Engineer

08/2023 – 10/2023

Net-Ray Pulsar

- **Integrated AI capabilities into web platforms**, improving e-commerce conversion rates and automation efficiency
- Designed APIs and managed infrastructure for production reliability, ensuring high uptime
- Tech Stack: Node.js | Next.js | Python | Transformers | MySQL | GraphQL | Fedora Linux

Full Stack Engineer

10/2021 – 04/2023

Inensia

- Delivered production-ready features and ensured high code quality standards, reducing bug rate over time
- **Mentored team members and contributed to team productivity**, improving onboarding speed and knowledge sharing

- **Optimized Team Performance:** Mentored new hires, facilitated training, and collaborated across teams for seamless project execution.
- Tech Stack: .NET Framework | JavaScript | Azure DevOps | CI/CD | Git

Education

University of Ruse Computer Systems and Technologies	2022 - ongoing
Software University (SoftUni) Full Stack Web Development with C# and React.js	2020–2022
Vocational High School of Electronics and Electrical Engineering Software Development	2017–2022
